

05/08/18

Dear Parent/Guardian,

For summer 2018 as part of a Summer ELA/Math Project for the 2018-19 school year, Grade 10 (Yes, you will soon be 10th graders) students are using a program called Study Island, an online learning resource that will help students with standards mastery. Because Study Island is web-based, students will be able to continue their learning outside of the classroom.

I have included a set of instructions to help you get your student up and running at home. You'll want to learn how to help them access their assignments. When your student completes an assignment, you will be able to track their progress in the MyClass feature.

As part of Study Island, Blue Ribbons are awarded to students when they master a topic. Throughout the summer, make sure to take a look at how many blue ribbons your student has received for their hard work.

If you do not have internet access at home, your student will be able to use the facilities at the local library. The following are due dates for the students:

June 1: Complete the Pre-Test

August 11: Complete all Classwork

August 24: Complete the Post Test

This will count as a grade for next year's Advisory class. Please let me know if you have any questions regarding Study Island at any time.

Sincerely,

Evelyn A. Edney, Ed.D.

Principal
